

MAIN LINE

1. P57 - GET INVOICE FROM MAG SYSTEM

1. CLIENT NBR: 168 - enter the client number (165 for SA, and 168 for GP).

2. INVOICE FILE NAME:[-----] - Enter the file name or F4 to lookup the file

```
9200600
9220600
922060001
1003060001
1003060101
1003060201
```

3. PICK SESSION NBR : __ DESC : _____ ** Leave these fields blank when downloading for the mainline.

4. THIS INVOICE WILL NOT BE MERGED WITH ANY OTHER - This message will display at the bottom of the screen

5. Press the F9 key, the system will think a minute, then return to the main menu

2. P25 - LOAD CUSTOMER / UPC FILES

1. INVOICE FILE NAME: 10030600 - Input the file name just like you have always done

2. DEFAULT MAX TOTE WGT : 40.00 -

3. DEFAULT WGT VARIANCE : 1.00 - Input the max weight and variance just like you have always done.

4. DEALER/UPC FILES COPIED TO BUNDLE LINE _
CUSTOMER RECORDS ADDED : 3,467 _
UPC RECORDS ADDED : 46,285 _

The message above displays, press enter to continue

3. P44 - PRINT VIP EXCEPTION REPORT

1. INVOICE FILE NAME: 10030600 - Input the file name
PRINT TO SCREEN USE 5 OR 6
SELECT PRINTER (1- 8): 1

4. P22 - TITLE ISSUE WEIGHT ADD/UPDATE

1. ARE YOU USING SCALES (Y/N)? N
2. USE SCANNER FOR TITLES (Y/N)? N - You can scan a title to call it up now
3. Everything is else is the same

5. P58 CREATE PICKING FILE

!!!!This is cool. Now you can download and run the P25, P44, P58 on a new file, while you are still picking on an old file. This is because each invoice file lives in its own directory. Other than that, everything else is the same.

6. P87 Print VIP Labels - same as the SCO box

7.. P82 - Pick Processing - no changes

8. P88 - Verify Items Picked -

Main line - This program was changed to allow you to key in the box number you need to get to if the scale gets out of sequence.

Reweigh - No changes

9. P90 - No changes

10. P50 - Set Session Dispostion **NEW

This program is where you check to see what files are out there to be cleaned up, and where you set the session status.

REORDER LINE

1. P57 - GET INVOICE FROM MAG SYSTEM

1. CLIENT NBR: 168 - enter the client number (165 for SA, and 168 for GP).

2. INVOICE FILE NAME:[-----] - Enter the file name or F4 to lookup the file

```
9200600
9220600
922060001
1003060001
1003060101
1003060201
```

3. PICK SESSION NBR : __ DESC : _____

Reorder picking files are created daily. Each of the daily files can be downloaded and then assigned to a session number.

5. Press the F9 key, the system will think a minute, then return to the main menu

2. P25 - LOAD CUSTOMER / UPC FILES

1. INVOICE FILE NAME: 10030600 - Input the file name just like you have always done

2. DEFAULT MAX TOTE WGT : 40.00 -

3. DEFAULT WGT VARIANCE : 1.00 - Input the max weight and variance just like you have always done.

4. DEALER/UPC FILES COPIED TO BUNDLE LINE _
CUSTOMER RECORDS ADDED : 3,467 _
UPC RECORDS ADDED : 46,285 _

The message above displays, press enter to continue

3. P44 - PRINT VIP EXCEPTION REPORT

1. INVOICE FILE NAME: 10030600 - Input the file name
PRINT TO SCREEN USE 5 OR 6
SELECT PRINTER (1- 8): 1

4. P22 - TITLE ISSUE WEIGHT ADD/UPDATE

1. ARE YOU USING SCALES (Y/N)? N
2. USE SCANNER FOR TITLES (Y/N)? N - You can scan a title to call it up now
3. Everything is else is the same

5. P58 CREATE PICKING FILE

!!!!This is cool. Now you can download and run the P25, P44, P58 on a new file, while you are still picking on an old file. This is because each invoice file lives in its own directory. Other than that, everything else is the same.

6. P55 - MERGE VIP files

This program is used to merge an invoice download file into a Session. The logic here is that you assign a session number based on the julian week (week 1 to week 52). As reorder pick files are created each day, you merge these daily files into the weekly session number.

7. P50 - Set Session Dispostion **NEW

This program is where you check to see what files are out there to be cleaned up, and where you review and set the session status.

8. P87 Print VIP Labels - same as the SCO box

9. P81 - Start Scanning Stations - This program controls the scanning stations. You will use this to start scanning in 'station b' - this acutally runs both scanners.

9 P82 - Pick Processing - no changes

10. P88 - Verify Items Picked -

Main line - This program was changed to allow you to key in the box number you need to get to if the scale gets out of sequence.

Reweigh - No changes

11 P90 - No changes

12. P50 - Set Session Dispostion **NEW

This program is where you check to see what files are out there to be cleaned up, and where you review and set the session status.
