

## **SMART TERM INSTALL**

- Put CD in CD drive
- Click on 'install Smarterm single user'
- Select language
- At welcome click 'Next'
- In 'User name' field there should already be a name there. Leave that alone.
- At 'Organization' should be set to DPS.
- At 'License Number' field enter the license number found on the side of the Smarterm box.
- At Emulation Set to Digital VT
- At Set up type choose complete
- At Profile Server select no
- At Ready to install select install.
- When finished select exit

## **LOG INTO SMART TERM**

- On you tool bar click the Start button
- Select Programs
- Select Smarterm Essential
- Open Smarttterm Essential
- Select Digital VT session
- What kind of session? You are one of three : Direct Serial Connection, Modem or Telnet.
  - Direct Serial is if your PC is connected directly to the RS6000 by a cable
  - Modem is if you are dialing in to the RS6000.
  - Telnet is if you are connected to the RS6000 by a network.
- Host name This is the IP address of the RS6000  
**(For the DPS office the RS6000 Address is 172.16.199.1)**

## **Before you enter into the DPS main menu you must do the following things**

- Go into properties
- Select emulation
  - Under Display don't change anything
  - Under Terminal select VT200 7 bit
  - Turn on 'Lock User Definition Keys' and 'Lock User Features'.
  - Under Keyboard change the field 'Backspace' to 'Backspace' and change F1 through F5 to function keys
- Under Tabs - your personal preference

- Under Fonts- Your personal preference
- Under color - your personal preference
- Click 'OK'

When you are satisfied with all the changes that you have made click on the save icon (The little floppy disk at top left hand corner of the screen.)  
Save as 'DPS Login'.

## **SETTING GLOBAL PROPERTIES**

- Select properties at the top of the screen
- Select Global Properties
- Select shut Down
  - Turn on 'close session without saving settings'
  - Turn on 'when session is disconnected close sessions'.
- Exit Smarterm

## **MAPPING THE KEYBOARD**

- Right click on My Computer
- Select explore
- Open the C: Drive
- Open the Program folder
- Open the Persoft folder
- Open STEssen folder
- Open Keyboard map folder
- Scroll down to the Z: Drive (Network Drive)
- Open the 'Z:' drive (Network drive)
- Open the Smarterm file
- Double Click on the profile file
- Scroll up until you see the folder 'Keymap' under STEssen
- Click and hold Enhanced (Should be on the left part of the screen. It is found in the 'Profile' Folder.) and move it over the Keymap folder. (The folder name will become highlighted)
- Release Enhanced. (You have now moved Enhanced into the Keymap folder.)
- Close the window
- with diskette in, click on A drive - click on Enhanced and drag over to Keyboard Map folder

## **GET BACK INTO SMARTERM**

- Select Tools
- Select Keyboard map

- Select enhancement
- Select ok
- Save
- Exit

## **CREATE SHORT CUT**

Right Click when you are at the desk top

- Select new
- Select shortcut
- Select browse
- Select programs file
- Select persoft
- Select smart essentials (or STEssen)
- Select session (Under 'File Name' change to 'All Files')
- Select DPS Login

Now you should have a Short cut on you Desk top for DPS Login and you are ready to go.
